neck fit contour serum FAQ's

What is Neck Fit Contour Serum?

It's a lightweight, roll-on serum for the neck and décolleté that immediately tightens skin, and tones it over time, for a more visibly lifted and sculpted appearance.

What makes it special?

This serum contains high-performance Flex Lift Contour Technology, which acts like invisible mesh to provide a visible lifting and tightening effect on skin. It also smoothes fine lines and helps protect skin against pollution, which can lead to premature signs of skin aging.

Why is a separate product needed for the neck?

No matter how healthy your face looks, your neckline can tell a different story. That's because neck skin is thin, delicate, and more vulnerable to sun damage, photosensitization from fragrances, and the wrinkle-deepening motion of looking down at your devices. It also loses strength and flexibility with age while neck muscles weaken underneath. These factors can exacerbate the appearance of lines, creases and sagging.

How much of this product should I use?

A little goes a long way! Only a thin layer of this serum should be used, so give it a gentle squeeze during application.

How long does the tightening effect last?

Since everyone's skin (and skin care regimen) is different, the duration of the tightening effect will vary from person to person.

Can I layer this over or under other serums?

This product is optimized to work with the skin on the neck, which is thinner than that on the face. We do not recommend applying a second serum either beneath or over Neck Fit Contour Serum, as it could interfere with the efficacy of the Flex Lift Contour Technology. Only moisturizer and SPF should be applied over this product.

Can I recommend neck Fit Contour Serum to men with beard growth or stubble?

In our experience Neck Fit Contour Serum can feel sticky if used in facial/beard hair, due to the Flex Lift Contour Technology. It is best to recommend avoiding use in this area, unless the hair is very short.

What metals have been used for the roller?

The roller is stainless steel.

Is there a preference for a.m. or p.m. use?

Neck Fit Contour Serum can be used am and pm.

neck fit refining masque FAQs

Can this be mixed or layered with any other products?

No, this should be applied directly on the skin of the neck and chest. Do not layer a professional serum underneath. You may choose the skin specific products to apply the face.

Can this be used around the eye or lip areas?

No, this is designed for the delicate skin of the neck and decollate.

Can I use any professional modalities or tools with Neck Fit Refining Masque?

Yes, this can be used with microcurrent, ultrasonic, and galvanic iontophoresis. This may also be used with manual massage tools, such as a jade roller, gua sha stone, or your hands.

What is the percentage of lactic acid in Neck Fit Refining Masque?

10% lactic acid (verbal communication only)

Can I perform professional exfoliation if using Neck Fit Refining Masque?

Yes. All professional exfoliants including Multivitamin Power Exfoliant and Exfoliant Accelerator 35 have been tested and approved for use during your Resurfacing module. Pro Power Peel is contraindicated for use.

Why does this professional masque fizz?

Neck Fit Refining Masque's unique fizzing form lends excitement and activity to professional skin treatments. Its audible, palpable fizz activates upon application – allowing enhanced penetration to refine and renew this delicate skin while encouraging the use of hands, tools and modalities for an engaging "neck workout" experience.

How does the fizzing action help penetrate the ingredients?

The fizzing action (the surfactant + volatile silicone) helps reduce surface tension on the skin barrier lipids, which is what allows enhanced product (ingredient) penetration.

Can I perform microcurrent muscle re-education after the Fascia Massage?

The Fascia Massage will hydrate and energize the connective tissues. This makes it ideal to perform muscle re-education after receiving the Fascia massage techniques.
