- Stand alone treatment
- ProSkin Deep Treatment add-on

# pro eye flash skin treatment

## step-by-step instructions

Total treatment time: 20 minutes

**ProTip:** Perform a virtual consultation prior to the client's service.

### Double Cleanse: 5 minutes

- Cleanse the eye area by applying 1-2 pumps of **PreCleanse** to damp esthetic wipes or cotton. Gently swipe around the orbital bone to remove makeup and oil-based debris.
- Dispense a small amount of **UltraCalming Cleanser** into a cup and mix with water. Apply with a fan masque brush around the eye area and lightly manipulate.
  - **Option:** If choosing to cleanse the entire eye, including mascara, and the client has lash extensions, opt for **Special Cleansing Gel**.
- Remove with damp esthetic wipes or cotton.

### Resurface and tone: 5 minutes

- Apply **Pro Power Eye Peel** patches to both eyes making sure they are flat on the skin.
- Apply **Conductive Masque Base** to brow bone on both eyes with fan masque brush.
- Use microcurrent specific iontophoresis to work over the brow bone area of the right eye for 2 minutes. Repeat on the left side for 2 minutes.
- Remove both patches and wipe away excess residue with damp esthetic wipes or cotton.

### Pro Power Eye Peel benefits to discuss

- Brightens under eye skin
- Helps even skin tone and texture
- Minimizes appearance of fine lines and wrinkles

### Post-treatment eye essentials:

#### **BioLumin-C Eye Serum**

A brightening Vitamin C eye serum that also helps firm and hydrate.

#### **Total Eye Care SPF 15**

A broad-spectrum eye cream that brightens the appearance of dark circles.

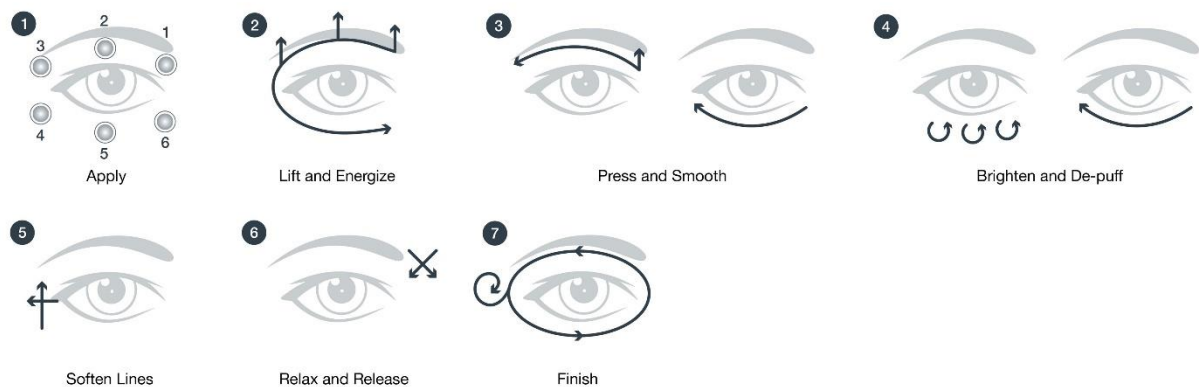

### Hydrate and Lift: 5 minutes

## professional services featuring pro power eye peel

- Apply a layer of Hyaluronic Acid Professional Serum around the orbital eye area on both eyes.
- Use microcurrent muscle re-education around the entire eye contour following the orbital bones. This includes cheekbones, crow's feet, and brow area, but avoid the eyelids.
- Remove with damp esthetic wipes or cotton rounds.

### Replenish and Brighten: 5 minutes

- Apply BioLumin-C PRO Serum around the eye area and perform massage with Cooling Eye Wands as shown below.
- Once the massage is finished, wipe any residue and layer Total Eye Care SPF 15 for UV protection.

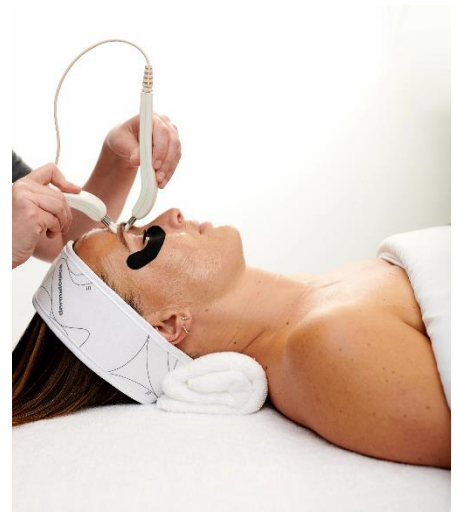

1. **Apply:** Apply about an almond size amount of BioLumin-C PRO Serum on the back of the hand. With the Cooling Eye Wand, generously apply 6 dots: 3 under eyebrows and 3 under eyes. Repeat on other eye.
2. **Lift and Energize:** Press and lift up at the inner, center and outer end of the eyebrow. Hold each lift for 1–2 seconds. Gently glide beneath the eye, back to the brow. Repeat 3 times.
3. **Press and Smooth:** With medium to firm pressure, lift at the beginning of the brow, then glide under the brow draining to temporal lymph nodes. Next, starting at inner corner of eye, press and smooth under the eyes draining out to temples. Repeat 3 times.
4. **Brighten and De-puff:** Gently perform small circles under eye, from the outer corner to the inner corner. Glide back toward the outer corner. Repeat 3 times.

## professional services featuring pro power eye peel

5. **Soften Lines:** Beginning near the temple, draw small t's by gliding with one wand upward and moving the other wand outward to hairline. Repeat on each side 6 times.
6. **Relax and Release:** With alternating eye wands, draw a small "x" between brows to smooth lines and release tension. Repeat 6 times.
7. Finish by circling around eyes one time and complete massage with small light circles at temples 6 times. Apply light pressure and remove wands. Gently massage in excess product.

## deep treatment featuring pro eye flash add-on

1. Apply Professional Serum and Professional Masque, avoiding the entire eye orbit area.
2. Follow the Pro Eye Flash **Resurface and Tone** phase.
3. Follow the Pro Eye Flash **Hydrate and Lift** phase.
4. Follow the **Replenish and Brighten** phase.
5. Remove professional serum and masque residue with steam towel or sponges.
6. Proceed to Dermal Layering module

## patch test guidelines

If you suspect your client could be sensitive or sensitized and may respond adversely to Pro Power Eye Peel patch testing is recommended to check if a client may be contraindicated to treatment or has reduced skin tolerance.

Prior to treatment conduct the patch test behind the client's ear to determine how the skin may respond to the product. A quick 10-15 minute test will assess skin tolerance and will only indicate the person's sensitivity to a highly active product.

A test immediately prior to treatment will not tell you if the client is allergic; to check for allergy monitor the test area and review in 24 - 48 hours before performing the treatment.

### Step-by-step instructions:

1. Wearing gloves dip a clean cotton bud or edge of a cotton round into the jar.
2. Apply to a discreet area behind the ear.
3. Leave for 2 minutes, then wipe away residue with a damp cotton round or aesthetic wipe.
4. You will need to watch for signs of extreme redness, rash, swelling or hives. If any of these appear, the client is contraindicated to Pro Power Eye Peel.
5. Follow up within 24 hours of applying product

## pre treatment guidelines

Clients must confirm that none of the contra-indications stated below apply to them and they must follow the pretreatment advice to ensure a safe and effective treatment.

### contraindications

- Recent resurfacing skin procedure such as laser, light therapy, microdermabrasion or chemical peel within the past two weeks.

- Has a contagious skin disease or infection, such as an active cold sore.
- Is pregnant or lactating.
- Allergies to any ingredients in the Pro Power Peel collection.
- Recent sun exposure / sunburned skin.
- Use of Retin-A or other retinol product within the past 48 hours.
- Highly sensitized / irritated skin and compromised barrier.

## professional services featuring pro power eye peel

### post care advice

- Keep regimen simple, moisturize well and use an SPF.
- Wear protective clothing such as sunglasses and a hat
- Limit sun exposure on the day of treatment and for a week afterwards
- No exfoliation 72 hours post service
- No retinoid use 72 hours post service

### caution

These products contain alpha hydroxy acids (AHA) that may increase your skin's sensitivity to the sun and particularly the possibility of sunburn. Use a sunscreen, wear protective clothing, and limit sun exposure while using this product and for a week afterwards. Use only as directed. Contact of the product with the skin must be of limited frequency or duration. If irritation persists, discontinue use and consult a physician. Avoid contact with eyes. If mixture gets in eyes, flush immediately with an eye wash.
